Further instructions

- Please, DO NOT MODIFY the account PASSWORD
- If you need to pay for a ticket, you can use the following data, valid only for the QA environment

Credit Card: 4111111111111111

CSC: 737

Expiration Date: 09/24

Should testers complete bookings/orders?

Yes

Goal of this test

Scenario 1

- Create a recurring event.
- Add event dates
- Add tickets
- Go to Publish Preview page
 - Select Public, to Publish Now.
 - Publish the event
- Search for events as attendee (PLEASE NOTE, every time we search for the event as attendee, the event must be published and On Sale.)
- Check that the global event as well as the particular events are public.

Scenario 2

- Create a recurring event.
- Add event dates
- Add tickets
- Go to Publish Preview page
 - Select Private and Keep it Private.
 - Choose audience Anyone with the link

- Publish the event
- Search for events as attendee (with the link) (PLEASE NOTE, every time we search for the event as attendee, the event must be published and On Sale.)
- Check that the global event as well as the particular events are private.

Scenario 3

- Create a recurring event.
- Add event dates
- Add tickets
- Go to Publish Preview page
 - Select Private with schedule to share publicly
 - Select date and time when it will go public. (Select same day with close time)
 - Publish the event
- Wait until the time is up
- Search for events as attendee (PLEASE NOTE, every time we search for the event as attendee, the event must be published and On Sale.)
- Check that the global event as well as the particular events are public.

Scenario 4

- Create a recurring event.
- Add event dates
- Add tickets
- Go to Publish Preview page
 - Select Public, to Publish Now.
 - Publish the event
- Search for events as attendee (PLEASE NOTE, every time we search for the event as attendee, the event must be published and On Sale.)
- Check that the global event as well as the particular events are public
- Unpublish the event
- Search for events as attendee
- Check that the global event as well as the particular events are unpublished

Out of scope

No need to test:

- Basic info page
- Details page
- Creation of event dates (Schedule option on side nav)
- Ticket creation and everything found on the ticket page
- Listing Page (the page displayed when the user clicks on View or Preview button).
- Checkout page.
- Manage events page

- Privacy section in the menu on the left (Privacy and Display)

Additional requirements

- The basic information, details, tickets, when and how they are published is global for all events.
- The day and time when the event occurs is independent for each event.
- For the creation of recurring events, on the event creation page (<https://www.eventbrite.com/manage/events/create>), we must select the option "Recurring Events" in the Date and Time section.
- When programming the publication of the event or programming the privacy from private to public, there is a cron that runs every 15 min, therefore if you schedule the publication or privacy of the event for example. at 12:03 PM, it will not be posted exactly at that time but at the time the cron runs again. In addition to that, in the QA environment there can be a delay of up to 4 hours. So don't report that kind of bug.

Test these features

• Preview & Publish Page / Recurring event (Tier 1)

BUG TYPES

- Functional

WHERE YOU CAN FIND THIS FEATURE:

You should see it on the left menu after clicking on Save & Continue button on basic info page.

WHAT YOU SHOULD FIND THERE/TEST FOR:

Test publish preview view for recurring events. All settings made in the publish preview view must be replicated to all events.

- Public Event

- Publish Now
- Schedule for later / Date and Time

- Private Event

- Choose audience
- Keep it private
- Yes, schedule to share publicly / Date and Time
